Beginners Sewing Course Completion Ceremony and Exhibition

GARD Center tells the journey of the Beginners Sewing course that came into existence during COVID-19 season. The Center is very excited to have seventeen (17) of twenty (20) participants completing the training experience.

Once again, we genuinely express our gratitude to the Mill Reef Fund for its invaluable donation for the success of this course. This afforded the participants an opportunity to be able to venture into a sewing for sustainable provision for their families.

Our sincerest thanks to our other partners NSA for its contribution of materials for sewing masks and surgical gowns that is of great necessity in this Corona Virus season where there is mandatory mask wearing. Additionally, Amiya Designs and Andra's Designs for imparting the sewing skills necessary to produce the items that were on display on Friday, September 18th, 2020 (pictures attached). We were truly blessed by an anonymous donor of six (6) sewing machines which was greatly a need and appreciated. This made an indelible mark on the course.

To our supporters including the National Garment Manufacturing Initiative and the Ministry of Trade for their continued assistance in our new venture.

Our pictures further tell the story of the success.
